

Custom Robotic Automation for Manufacturing Lines

At QComp, we're a robotics integrator with a team of expert engineers, designers, programmers, project managers, and implementers who collaborate closely with each other and our customers to ensure a just-right solution and optimal OEE.

We excel in glass handling and lidding, providing innovative solutions that ensure precision and efficiency. Our systems handle glass with care, minimizing breakage and boosting productivity.

We also specialize in picking, packing, and palletizing. Our advanced picking solutions enhance speed and accuracy, while our case packing systems accommodate various product sizes with ease. Our palletizing solutions efficiently stack and organize products for shipment, reducing manual labor and increasing throughput.

We conquer complexity.

We are

- An award-winning team with 30+ years of experience
- A3 Robotics Certified
- 100% employee-owned and part of the OwnersEdge family

Industries We Serve

- Glass
- Consumer Goods
- Non-Wovens Products
- Food & Beverage
- And more ...

Our Solutions

- Custom Glass Handling Solutions
- Robotic Lidders
- Picking Solutions
- Case Packing
- Palletizing
- Custom Solutions

Why QComp

- Proven expertise with global brands
- Extensive in-house R&D lab for pre-building testing of automation solutions
- 24/7 support, preventative maintenance, and reliable remote support
- Relentless pursuit of excellence and innovation
- Guarantee of the highest level of productivity and ROI
