

FOOD & BEVERAGE

Sanitary Food & Beverage Robotics

Many food products are difficult to handle due to their inconsistent shapes, delicate textures, or malleable structures. And let's not forget the importance of food safety.

The team at QComp Technologies has a solid reputation in robotic food and beverage automation. Our innovative spirit provides food companies with robust robotic solutions to optimize their processes using a variety of sanitary-designed solutions. The robots utilize vision guidance and advanced inspection systems to guarantee high-speed robotic packaging without sacrificing rigorous food safety and quality standards.

Developing a Solution Isn't Enough.

Customers choose QComp because of our deep experience, skill, and ingenuity in designing and installing custom robotic automation for complex food and beverage handling challenges. Our team works side-by-side with our customers to simulate potential solutions in real time and, together, we envision a finished product. We are relentless in our pursuit of customer satisfaction, not only promising optimal OEE, but delivering on that promise.

We conquer complexity.

Features

- Food safety & quality standards
- Thermal form tray loading
- Reliable & efficient case packing
- High-speed robotic food product reorientation
- Accurately pick & place delicate and difficult-to-transfer food products

Benefits

- Significantly increase production
- Easy-to-use interfaces
- Minimize downtime during product switches, or cleaning cycles
- Minimal maintenance requirements
- Increased safety and ergonomics for employees
